Luster: **Restored.**

- Easy to use
- No harsh chemicals
- Protects warranty

Available Sizes:

Small	750mL / 26oz
Large	3.75L / 1gal

*For extra protection
ask about Draka EHC's
permanent antimicrobial
solution, AMRail™*

Take years off of the appearance of your handrails by regular cleaning and conditioning!

Dull or dirty handrails are not only unattractive, they can harbour bacteria and deter passengers from safely holding them. Rubber handrails contain compounds that preserve integrity and enhance performance. These compounds eventually migrate to the surface and require proper cleaning.

Cleaner - Thermoplastic & Rubber Products

Draka EHC Handrail Cleaner has been specially formulated to remove stubborn grease and grime that accumulates on the surface of handrails. Escalator handrails cycle through an internal drive system attracting substances collected by other components.

Polish - Rubber Products

Draka EHC Handrail Polish revitalizes and conditions the surface of your rubber handrails. When left untreated, rubber handrails can crack as they are exposed to elements. Our polish restores luster, and provides a protective barrier.

With proper cleaning and polishing your handrails can look new again!
