FEATURES

Draka EHC wireway is available in standard sizes 2 1/2" square, 2 1/2" x 4", 4" square, 4 x 6", 6" square and 8" square, with customized sizes easily accommodated. Elbows, tees and crossovers are available, as well as nuts, bolts, mounting kits and strain bars. Wireway comes with two five-foot covers, #10-5/16 hexhead screws, screw protection and spot-welded coupling on one end.

At our North Carolina facility, superior materials combine with time-tested construction to produce the industry standard for wireway.

Draka EHC wireway begins with hot-dipped mill-galvanized sheet steel that conforms to UL 870 and CSA C22.2 No. 26 standards. Screws are galvanized as well.

The steel is then skillfully formed into trough and fittings within tolerances of 1/16" for internal dimension and 1/32" for joints, corners and screw/hole placement. Welds are made by hand.

UNMATCHED WARRANTY AND SELECTION

Draka EHC wireway is UL listed and meets all appropriate CSA standards. It is also backed by an industry-best lifetime limited warranty.

Along with offering our own wireway, Draka EHC offers a complete selection of flexible conduit (both regular and watertight), EMT and rigid pipe with all necessary fittings. We also offer a full complement of cutting and splicing tools, connectors and hardware for wire installation and management.

CONSTRUCTION DETAILS

Tolerances: Inside dimensions from 0 to + 1/16 in.;
joints, corners and adjoining edges to + 1/32 in.;
screw and hole placement to + 1/32 in.

Materials: Hot-dipped, mill-galvanized steel

General: Uniform knockouts 1/2 in. and 3/4 in. every 12 in.
EXCEPT FOR UGTR 254120CSA which has knockouts
1/2 in., 3/4 in. and 1 in. every 12 in.

Special size wireway and wireway without knockouts are available with short lead times. Call Draka EHC at 1-877-372-5237 for further information.
